

## AXIS SERIES LINEAR ACTUATORS

LINEAR MOTOR AND BALL SCREW DRIVE TECHNOLOGIES

ENABLING AUTOMATION IN MOTION & CONTROL

## ENABLING AUTOMATION

### NSK MECHATRONIC SYSTEM SOLUTIONS

For decades, NSK has specialized in developing electromechanical solutions – integrating our precision machine components with control technology – to deliver advanced, reliable and precise motion and control.

Robotic surgery. Medical imaging. Biomedicine. Semiconductor. 3D printing. Factory automation. Our customers are vast and diverse, united by precision-critical applications and NSK's ability to achieve coherent mechatronic solutions that offer:

- › Augmented machine function and accuracy
- › Optimized system performance, space and life
- › Reduced costs and complexity

From complex systems to single-axis solutions, NSK delivers innovative and ideal integrated motion solutions to enable automation and accuracy in machine function, for a competitive edge to our customers.

## HIGH PERFORMANCE. SIMPLE. FLEXIBLE.

For system designers seeking high capacity, high speed and ultra-precise linear indexing and positioning, NSK applies our accumulated expertise with ball screws, linear guides and support bearings into our new line of single-axis actuators: the AXIS series. Compact and sleek, yet robust, NSK's AXIS actuators are estimable workhorses that deliver seamless integration with considerable benefits including:

- › **Robust drive technology options** – ball screw or linear motor coil
- › **Flexible, open-ended integration** – a wide range of servo/stepper motor compatibility (BMAX); universal position feedback (LMAX)
- › **Net positive performance** – achieved with proven NSK precision ground ball screw and linear guide technologies
- › **Simplified installation** – multiple datum planes and counterbore holes
- › **Modular compatibility** – BMAX and LMAX designs are interchangeable and exchangeable without need for machine modification

**Pictured from left:**  
BMAX ball screw actuator and  
LMAX linear motor actuator

# LMAX LINEAR MOTOR ACTUATORS

## DESIGN FEATURES

- › Linear motor drive technology with open-ended, flexible integration into control systems
- › Available with 175 mm and 200 mm frame widths and scalable drive components to achieve a wide performance spectrum including:
  - › sub-micron positioning accuracy
  - › speeds as high as 5m/s
  - › stroke distance as great as 3.8 meters
- › Actuator base includes multiple datum planes to facilitate highly accurate installation
- › Dimensionally interchangeable and exchangeable with BMAX series with no machine modification required
- › Featuring integrated NS-AL compact, high-load series linear ball guides equipped with long-life, maintenance-free K1-L lubrication units
- › Optional accessories including covers, feedback options, sensor kits, combination and gantry plates

**Above:** Linear motor drive technology with NS-AL series linear guides equipped with K1-L lubrication units

# BMAX BALL SCREW ACTUATORS

## DESIGN FEATURES

- › Precision ground ball screw drive technology with C5 accuracy
- › Compatible with a wide variety of servo/stepper motors
- › Available in 175 mm and 200 mm frame widths
- › Actuator base includes multiple datum planes to facilitate highly accurate installation
- › Dimensionally interchangeable and exchangeable with LMAX series with no machine modification required
- › Featuring special design, integrated ball screw and NS-AL compact, high-load series linear ball guides; both are equipped with long-life, maintenance-free K1(-L) lubrication units
- › Optional accessories include motor wrap kits, covers, sensor kits, combination and gantry plates

**Above:** Precision ground ball screw drive technology with integrated NS-AL series linear guides

# NSK PARTNERING TO ACCELERATE INNOVATION

AXIS series actuators are designed, tested and built by NSK Americas mechatronics experts and integration teams, with decades of accumulated expertise in materials engineering, tribology, and mechatronic integration. They are manufactured domestically at our Franklin, Indiana facility, and our ability to respond quickly and precisely to customer needs is unsurpassed in the industry.

- › **Experience** – NSK partners with companies in virtually every industry. Our depth of experience enables us to bring customers field-proven solutions, supporting their operations with accelerated innovation and automation in robotics, medical, semiconductor, material handling, electronics, automotive assembly and other automation applications.
- › **Fit** – We tailor our solutions to meet your specific performance needs, cost targets, maintenance intervals and service lifetime requirements. We bring robust resources to bear on design, deployment, and speed to market.

With NSK, our customers can expect end-to-end life cycle optimization with:

## DESIGN AND DEVELOPMENT

- › System design proposal with CAD model
- › Component failure analysis and benchmarking
- › Optimized material technologies
- › Applications simulation

## PROJECT MANAGEMENT

- › Design reviews
- › Prototype with testing and reporting
- › Production schedule

## AFTER SALES SERVICE

- › On-site support for system installation
- › Component failure analysis and benchmarking
- › Training

## ACCUMULATED EXPERTISE, OPTIMAL SUPPORT

For your precision machine component and integrated system requirements, you can rely on the optimum interaction of NSK design solutions, comprehensive engineering support, domestic manufacturing capabilities and access to our global technology network. Our local automation experts will collaborate closely with you through all aspects of design, provide intensive project management and extend comprehensive technical support. We aim to deliver to our customers the ideal motion and control solution and experience.

Visit [nskautomation.com](http://nskautomation.com) to review products and services, case studies and videos, and to find an NSK distributor near you.
